

Korn & Foderstoftransportvogne fra FAF

FAF (Fyens Andels Foderstofforretning) Købte i 1976 nogle brugte Hks-x vogne af DSB. Det var vogne med bremseplatform og uden bremseplatform.

FAF fjernede den ene side af vognene og indsatte en side af presenningstof og blændede jalousierne.

Vognene udrangeredes i 1978.

FAF Købte også nogle brugte Gkms. Disse vogne fik jalousierne i enderne blændet. Også disse vogne udrangeredes i 1978.

In 1976 **FAF** (Fyens Andels Foderstofforretning) bought used Hks-x wagons, some with some without braking platform.

FAF substituted one of the sides with a tarpaulin to facilitate access and covered the ventilation openings with metal sheets. The wagons were taken out of service in 1978.

FAF also bought some used Gkms. These were only slightly rebuilt as some of the ventilation openings in the ends were covered with metal sheets. These wagons were also taken out of service in 1978.

All wagons were used for the transportation of grain and fodder.

Vognene er lavet af Carl P. Brager (CaBrag, tekstur), Bjarne Larsen (bl, gmax modeller) og Kim Størup (KimS, tekniske filer).

The vans are made by Carl P. Brager (CaBrag, texture), Bjarne Larsen (bl, gmax models) and Kim Størup (KimS, technical files).
